

## COMPANY OVERVIEW

### Netstar History

Netstar, Inc. was founded in Bellevue, WA in 1999 after its founder, Tony Cheng, realized that his goals no longer aligned with those of the mega-sized carrier he worked for. While Tony's priority was, and continues to be, to provide his customers with the best possible service, the carrier's main objective was the sale of products and services.

Tony launched Netstar as an independent telecom services broker, operating out of his home office. He committed to reducing his customer's costs and securing services that nurtured growth and supported profitability. And as his vision of a customer-centric company grew, so did his specialized team.

In 2001, changes in the telecom industry brought about an evolution in the way Netstar did business. Tony realized that the commoditization of telecom services was resulting in a change of his customers' needs. And thus, with the goal of helping his customers adjust, he launched Netstar's current business model, complete with its new service offerings: Cost Reduction, Service Procurement and Telecom Management.

Today, Netstar's robust services continue to add value for its clients, regardless of economic conditions. When budgets are tight, customers reduce costs and have their services evaluated for efficiency. And when their companies are growing they turn to Netstar to expand their services and infrastructure to meet operational changes.

Furthermore, Netstar continues to evaluate the constantly changing landscape in the cellular and telecom fields and anticipates the needs of its clients. As a critical corporate initiative, its staff dedicates itself to continued education relating to new technology and carrier products, pricing and processes.

In the last few years, Netstar has experienced significant growth, contributing that growth to the delivery of outstanding customer service. With a proven team based approach and years of successful experience, Netstar's employees aim to always provide their clients with the best possible results.

### Mission

Netstar exists to accomplish three outcomes for clients: reduce telecom expenditures, optimize telecom services and fulfill the daily tasks of telecom management by providing exemplary customer service.

### Values

Integrity | Initiative | Action

## Clientele
